1. Product Overview

CV Repository is a full-stack talent review platform. Recruiters and executive reviewers upload CV PDFs, run them through an AI-powered pipeline (extraction, profiling, ranking), and triage candidates against reusable job definitions and operational hiring campaigns.

Two client surfaces

- Web admin (Next.js) - upload, library management, pipeline monitoring, job/campaign CRUD, ranking controls, and keyword search
- Mobile exec feed (Flutter) - ranked candidate cards, reactions, shortlists, AI chat with citations, and team leaderboard

Key capabilities

- PDF ingest with text extraction and Meilisearch indexing
- Groq-powered profile extraction, fit scoring, one-pagers, and chat
- Reusable job definitions and lifecycle-managed hiring campaigns
- Ranked feeds, reactions (like/star/pass/shortlist), and analytics
- Evidence-backed natural-language Q&A across the CV corpus

2. Platform Architecture

Both clients share a single Go API backend with PostgreSQL metadata, filesystem PDF storage, and background worker processing.

Backend services

- Go API - REST endpoints for CVs, jobs, campaigns, feed, reactions, chat, stats
- Go worker - async extraction, profiling, and ranking jobs
- PostgreSQL - CV, job, campaign, and reaction metadata
- Meilisearch - full-text keyword search over extracted CV text
- Apache Tika - PDF text extraction
- Groq - LLM for profiles, ranking, one-pagers, and chat answers

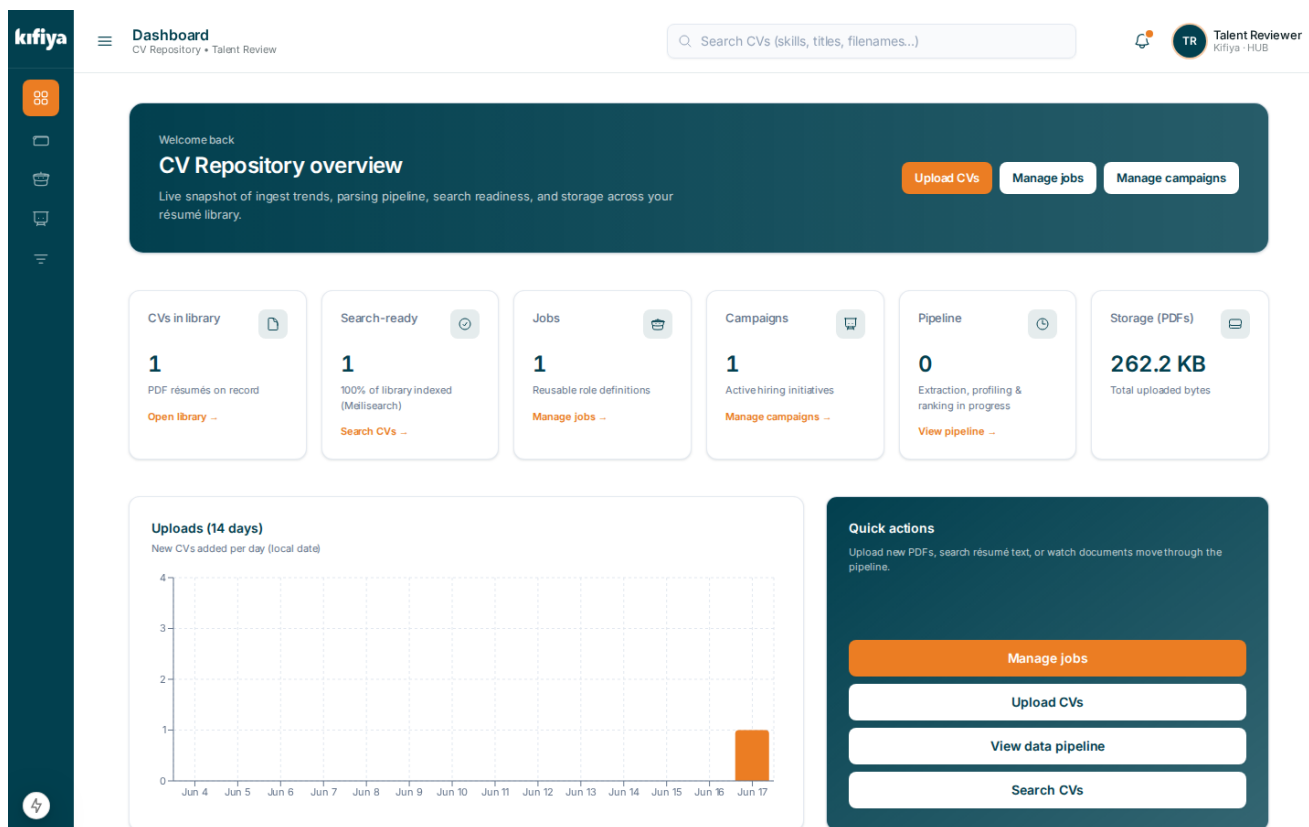

Deployment

- Web UI: `npm run dev` (default `http://localhost:3000`, proxies to API)
- Mobile: `flutter run` with `--dart-define=API_BASE_URL=<host>:8080`
- Infrastructure: docker compose for Postgres, Meilisearch, and Tika

3. Web Admin - Navigation

The web admin uses a persistent sidebar with global search, notifications, and reviewer profile in the top bar.

- Dashboard - library metrics, upload trends, quick actions
- Library - all CV documents with extraction status
- Jobs - reusable role definitions for ranking
- Campaigns - operational hiring initiatives with lifecycle
- Pipeline - ingestion, extraction, profiling, and ranking stages

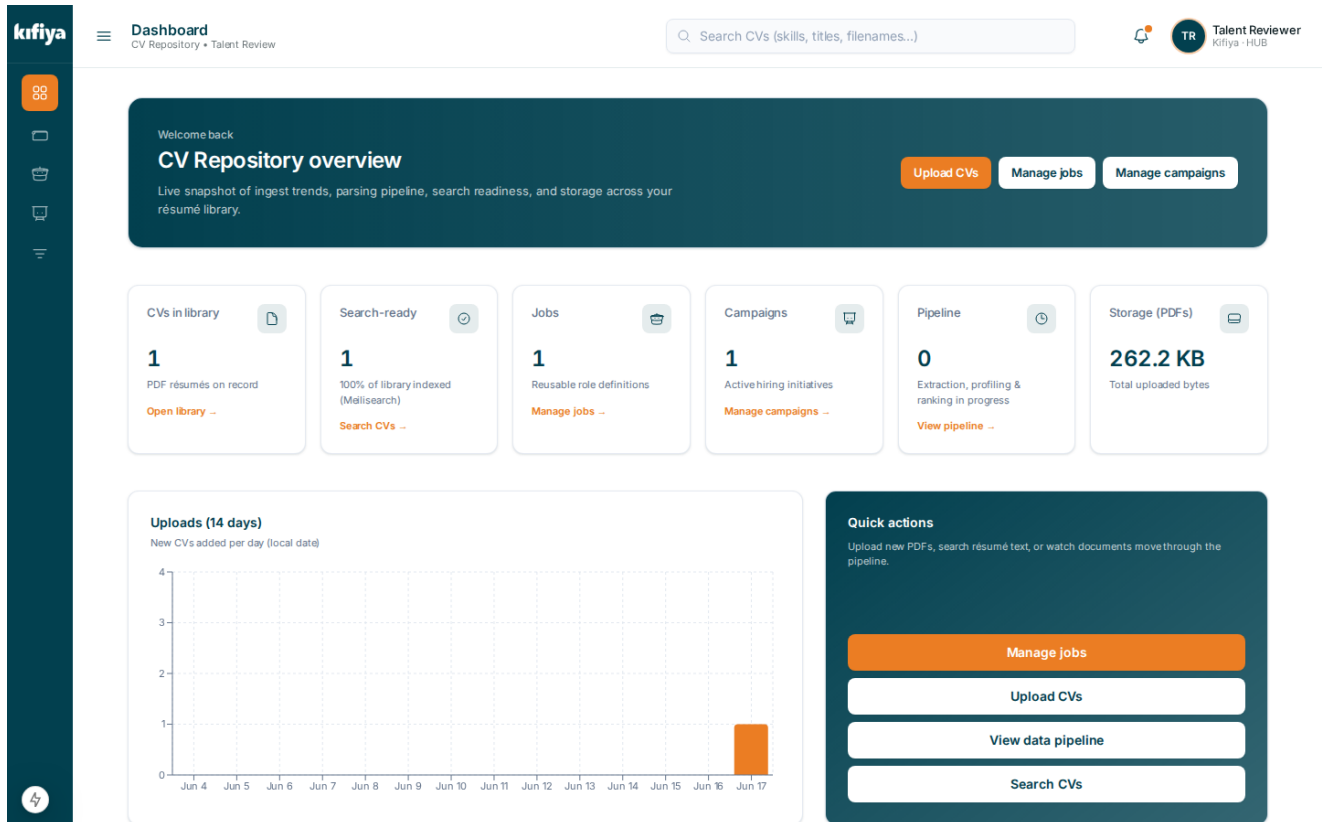

Web admin shell and dashboard

4. Web Admin - Dashboard

Live snapshot of the CV library: ingest volume, parse pipeline status, search readiness, storage usage, and 14-day upload trends.

- Stat cards for library size, search-ready count, jobs, campaigns, pipeline, storage
- Upload activity chart (14 days)
- Quick actions: upload CVs, manage jobs/campaigns, view pipeline, search

Dashboard - CV repository overview

5. Web Admin - CV Library

Browse all uploaded résumé PDFs with extraction and indexing status.

- Paginated table of CV documents
- Status badges for extraction, profiling, and indexing
- Click through to candidate profile and PDF viewer

6. Web Admin - CV Detail

Individual CV view with extracted profile, pipeline status, and PDF preview.

- Candidate name, contact, skills, and experience from AI extraction
- Pipeline stage indicators
- Embedded PDF viewer

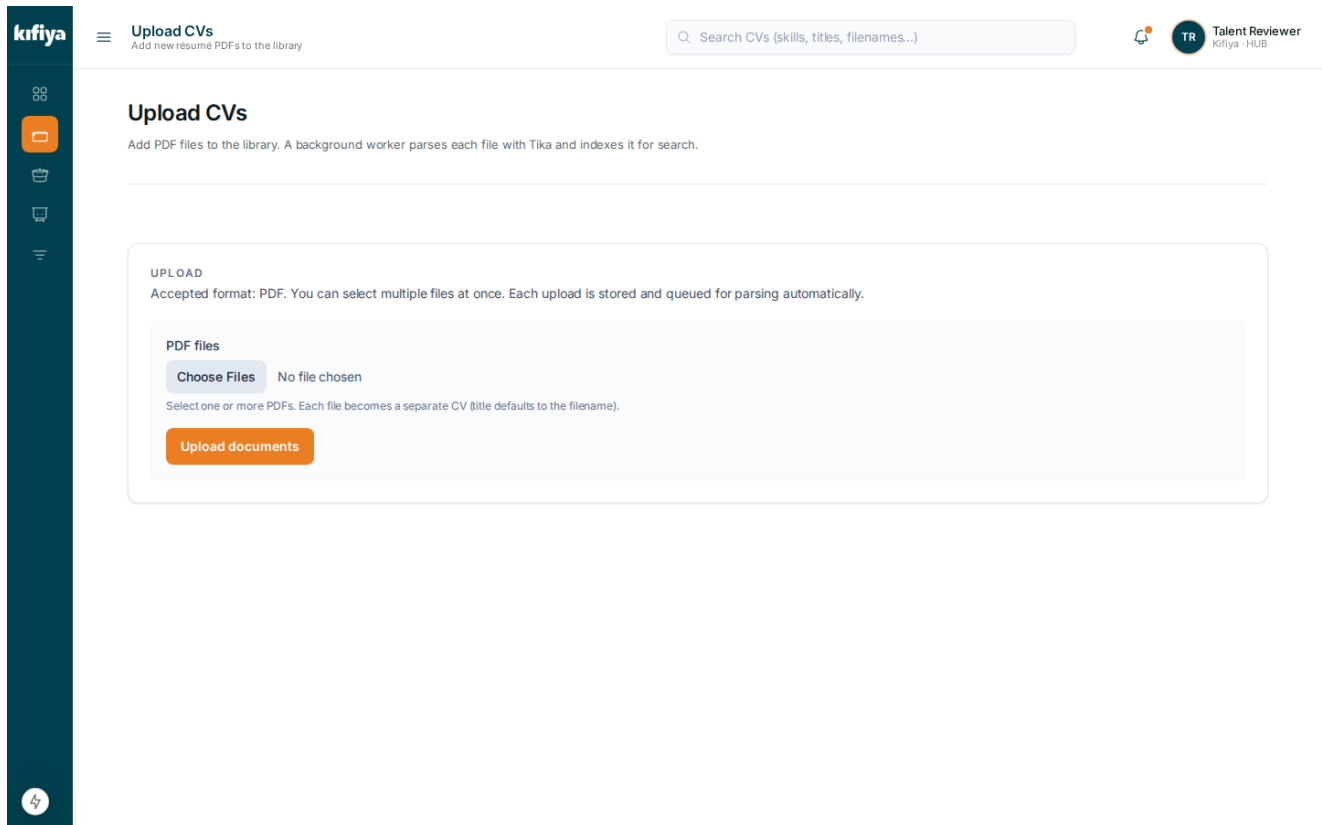

The screenshot shows the 'CV Detail' page in the Kufiya Web Admin. The interface includes a dark sidebar on the left with the 'kufiya' logo and navigation icons. The main content area has a header with a search bar and a 'Talent Reviewer' profile. Below the header, the page title is 'Library / sudip bhandari resume - backend engineer.pdf'. The main content area displays the CV details for 'sudip bhandari resume - backend engineer.pdf'. It includes a search bar, a 'Delete' button, and a large preview area for the PDF document. The preview area is labeled 'PREVIEW' and has a link to 'Open in new tab'.

CV detail - profile and PDF viewer

7. Web Admin - Upload

Drag-and-drop or file-picker upload for new résumé PDFs.

- Multi-file upload support
- Optional title override per document
- Triggers background extraction and profiling pipeline

Upload - add new CV PDFs

8. Web Admin - Jobs

Manage reusable role definitions (title + job description) used for CV ranking.

- List all job definitions with ranked-candidate counts
- Create, edit, and delete roles
- Rank CVs against a job description on demand

The screenshot displays the 'Job management' section of the Kufiya web application. The header includes the Kufiya logo, a navigation menu, the title 'Job management' with the subtitle 'Reusable role definitions for CV ranking', a search bar for CVs, and a 'Talent Reviewer' profile. The main content area features a 'Job definitions' table with columns for 'TITLE', 'CREATED', and 'ACTIONS'. A single entry for 'Backend Developer' is shown, created on '6/17/2026'. The table includes 'Edit' and 'Delete' buttons for each entry. A 'New job' button is located at the top right of the table. Pagination controls at the bottom indicate 'Showing 1-1 of 1' and 'Page 1 / 1'.

Job description

About the role
We are seeking a skilled Backend Developer to join our team. The successful candidate will be responsible for designing, developing, and maintaining the backend of our applications.

Responsibilities

- * Design and implement scalable, efficient, and reliable backend systems
- * Collaborate with frontend developers to integrate backend services with the user interface
- * Develop and maintain APIs, databases, and server-side logic
- * Troubleshoot and resolve backend issues
- * Participate in code reviews and contribute to the improvement of the codebase

Requirements

- * Proficiency in one or more backend programming languages (e.g., Java, Python, Ruby)
- * Experience with database management systems (e.g., MySQL, MongoDB)
- * Knowledge of API design principles and RESTful APIs
- * Familiarity with cloud platforms (e.g., AWS, Azure, Google Cloud)

Nice to have

- * Experience with containerization (e.g., Docker) and orchestration (e.g., Kubernetes)
- * Knowledge of security best practices and authentication/authorization mechanisms

Job detail - description and ranking progress

10. Web Admin - Campaigns

Operational hiring campaigns with lifecycle status, client metadata, and analytics.

- Filter by status: Open, Active, Draft, Paused, Closed, Archived
- Table with ranked count, shortlist count, and creation date
- Create new campaigns and deactivate existing ones

11. Web Admin - Campaign Detail

Single campaign view with stats, ranked feed, and lifecycle controls.

- Campaign metadata: client, location, headcount, tags
- Review funnel analytics (ranked, shortlisted, reactions)
- Rank CVs and view ranked candidate feed

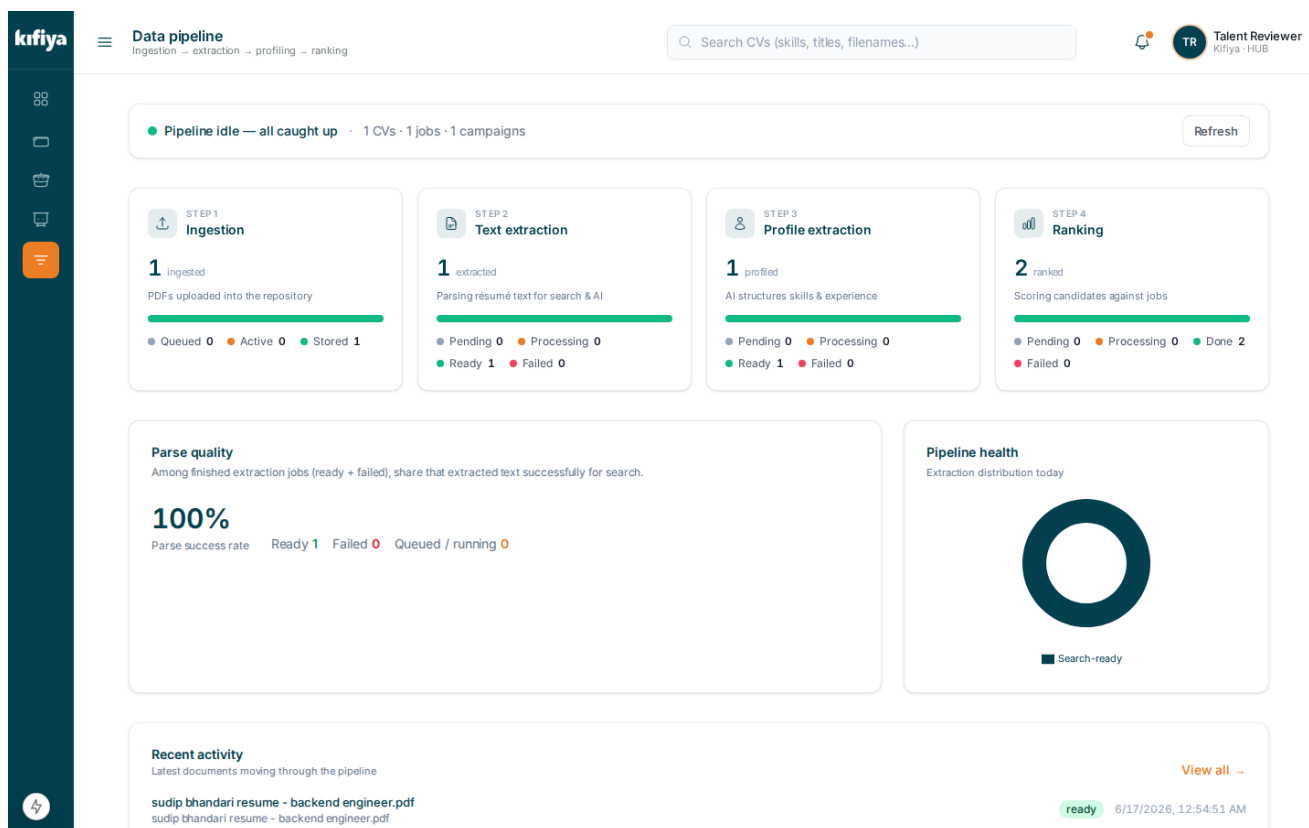

The screenshot displays the 'Campaign management' interface for 'Kufiya'. The top navigation bar includes the Kufiya logo, a menu icon, the title 'Campaign management' with the subtitle 'Operational hiring campaigns with lifecycle and analytics', a search bar for CVs, and a 'Talent Reviewer' profile. The main content area is titled 'All campaigns' and features a card for the 'Senior Backend Engineer' campaign, which is currently 'Active'. This card includes 'Deactivate' and 'Re-rank CVs' buttons and a note that the title and job description are locked after creation. Below the campaign card, a row of statistics shows: RANKED (1), REVIEWED (0), SHORTLISTED (0), STARRED (0), and AVG SCORE (90.0). A 'Ranking progress' bar indicates 100% completion (1/1), with counts for Pending (0), Processing (0), and Failed (0). The 'Job description' section is divided into three parts: 'About the role' (seeking an experienced Senior Backend Engineer), 'Responsibilities' (designing scalable systems, collaborating with cross-functional teams, code reviews, troubleshooting, and mentoring), and 'Requirements' (5+ years of experience, understanding of design patterns, database management, problem-solving skills, and communication skills).

Campaign detail - stats and ranked feed

12. Web Admin - Pipeline

Monitor the background processing pipeline across all CVs.

- Four stages: Ingestion, Extraction, Profiling, Ranking
- Per-stage counts: pending, processing, ready/done, failed
- Links to individual CVs stuck in a stage

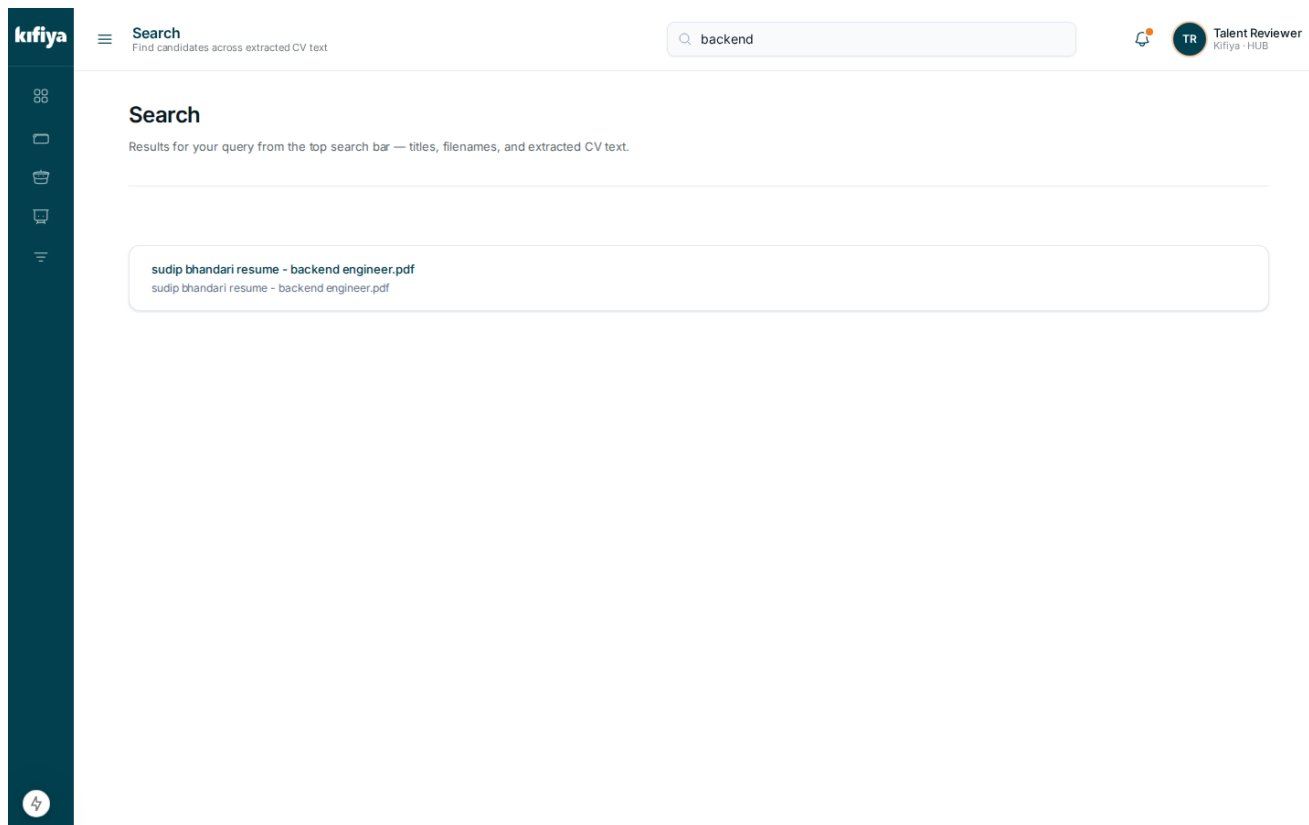

Pipeline - processing stage monitor

13. Web Admin - Search

Keyword search across extracted CV text via Meilisearch.

- Full-text search by skills, titles, filenames
- Instant results with relevance ranking
- Click through to CV detail

Search - keyword CV lookup

14. Web Admin - Profile

Reviewer account settings and activity summary.

- Reviewer identity and organization
- Review activity stats
- Preferences

The screenshot displays the 'Profile' page for a Talent Reviewer in the Kifiya system. On the left is a dark teal sidebar with the 'kifiya' logo at the top and several icons below. The main content area has a header with a search bar labeled 'Search CVs (skills, titles, filenames...)' and a user profile card for 'Talent Reviewer' with a 'TR' icon. Below the header, the profile details are shown in a table-like format with two columns: 'EMAIL' (talentreviewer@kifiya.com) and 'ORGANIZATION' (Kifiya Financial Technology). A section titled 'Account' follows, containing the text 'Sign out of this workspace when you are done reviewing.' and a 'Log out' button with a red icon. The top right corner of the page shows a notification bell and the user's name 'Talent Reviewer Kifiya - HUB'.

15. Mobile App - Overview

CV Exec Feed is the Flutter mobile client for executive candidate review. It gives reviewers a LinkedIn-inspired interface for triaging AI-ranked candidates on the go.

- Ranked candidate feed with fit scores and subscore breakdowns
- Like, star, and pass reactions with personal shortlists
- Evidence-backed AI chat across the CV pile
- Team leaderboard and review streak tracking

16. Mobile App - Navigation

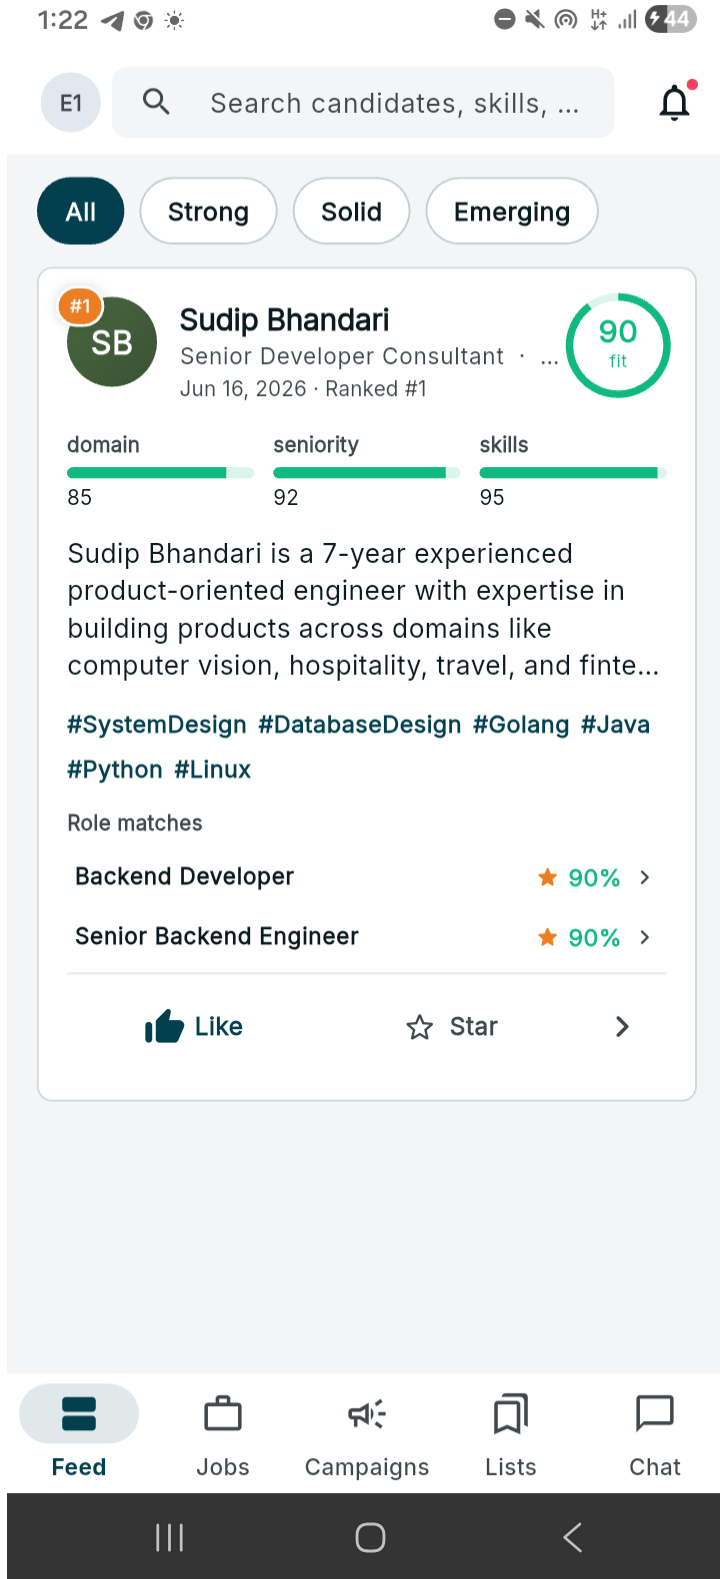

Every screen shares a consistent shell:

- Profile avatar (top left) - reviewer profile and stats
- Global search - candidates, skills, and roles
- Notifications bell - pipeline and ranking alerts
- Bottom tabs - Feed, Jobs, Campaigns, Lists, Chat

17. Mobile App - Feed

AI-ranked candidate cards sorted by fit score with All/Strong/Solid/Emerging filters.

- Fit score (0-100) with domain, seniority, and skills subscores
- TL;DR summary, skill tags, and role matches
- Like, Star, and Pass triage actions

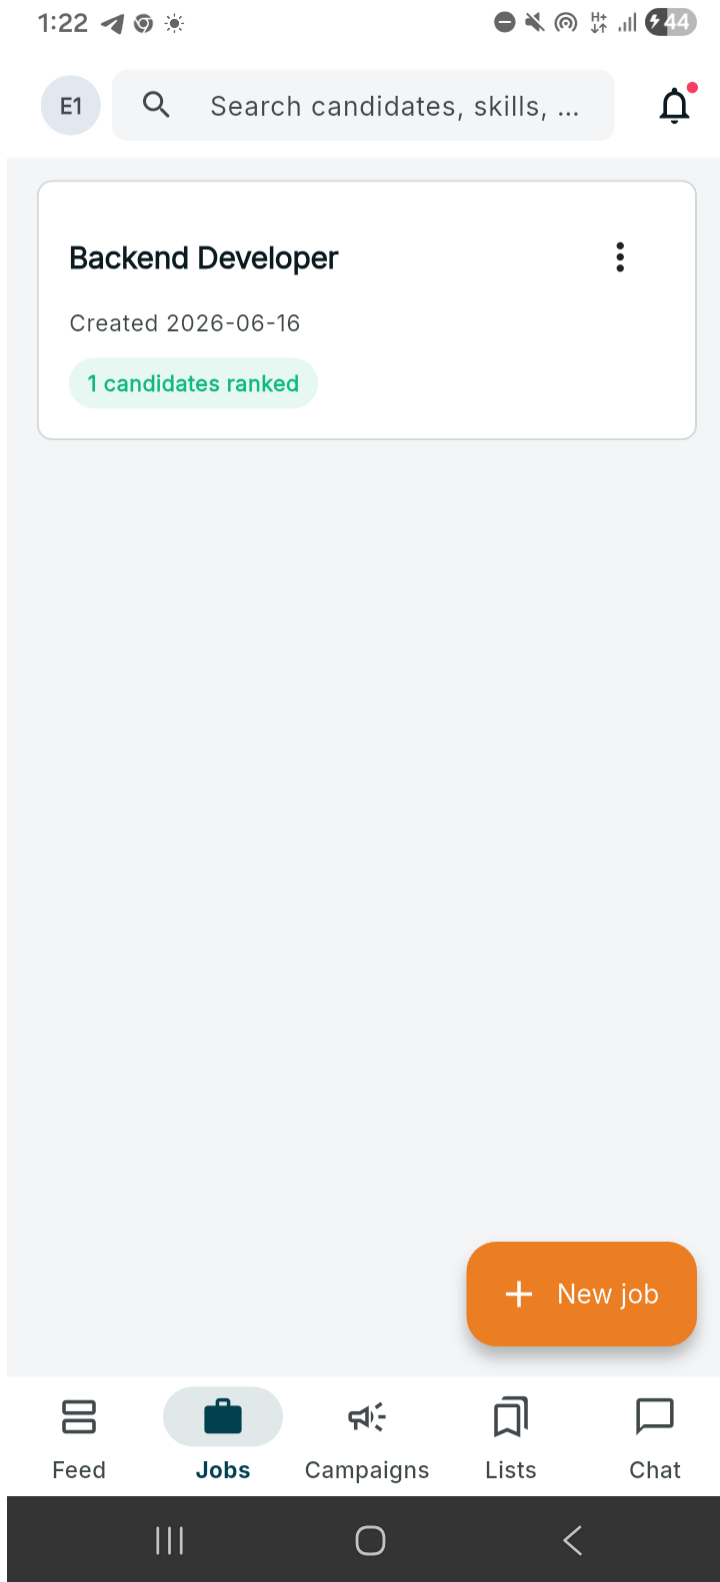

Mobile feed - ranked candidate cards

18. Mobile App - Jobs

Reusable role definitions with ranked-candidate counts.

- List of job definitions
- New job FAB
- Tap for detail, rank, or edit

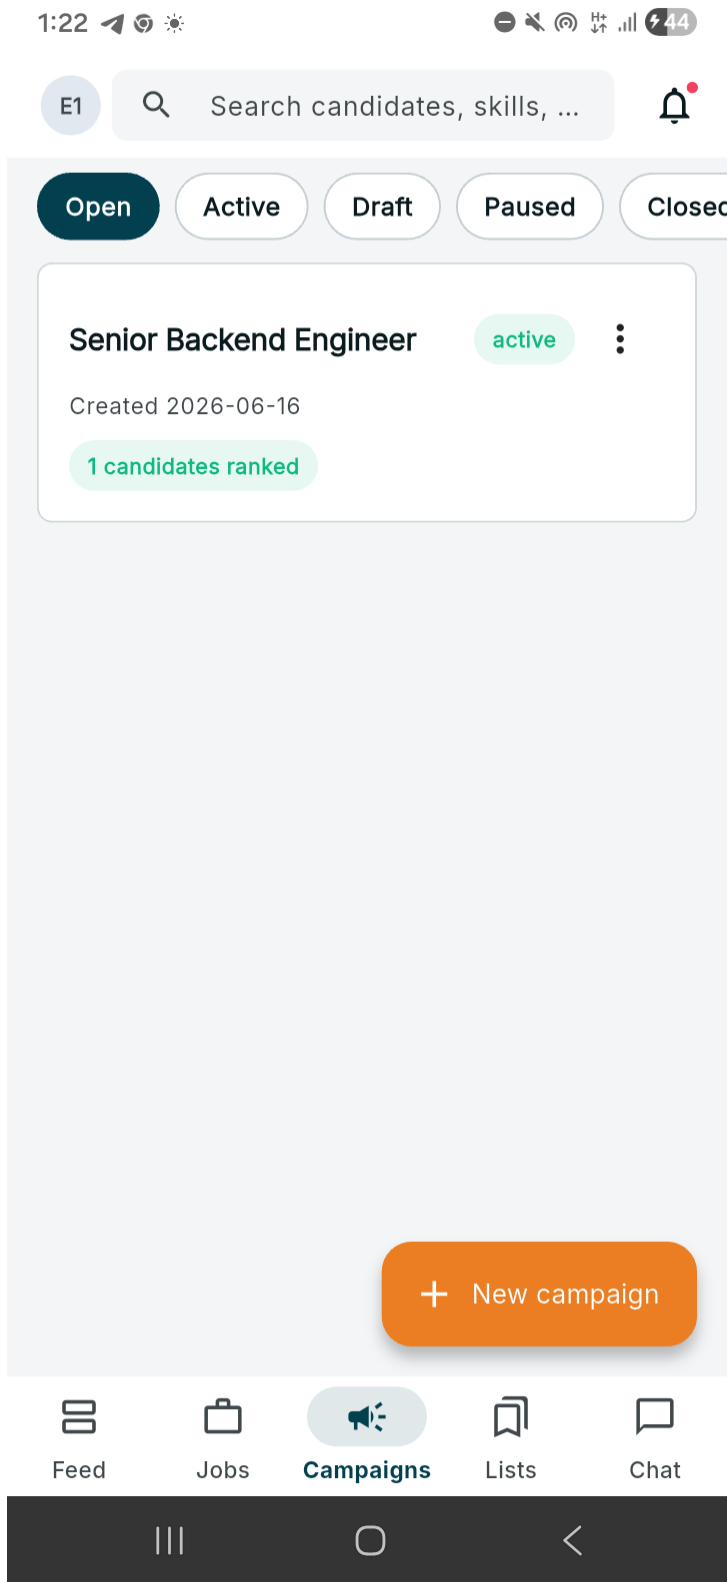

Mobile jobs - role definitions

19. Mobile App - Campaigns

Hiring initiatives with lifecycle status filters.

- Status filters: Open, Active, Draft, Paused, Closed, Archived
- Campaign cards with ranked count
- New campaign FAB

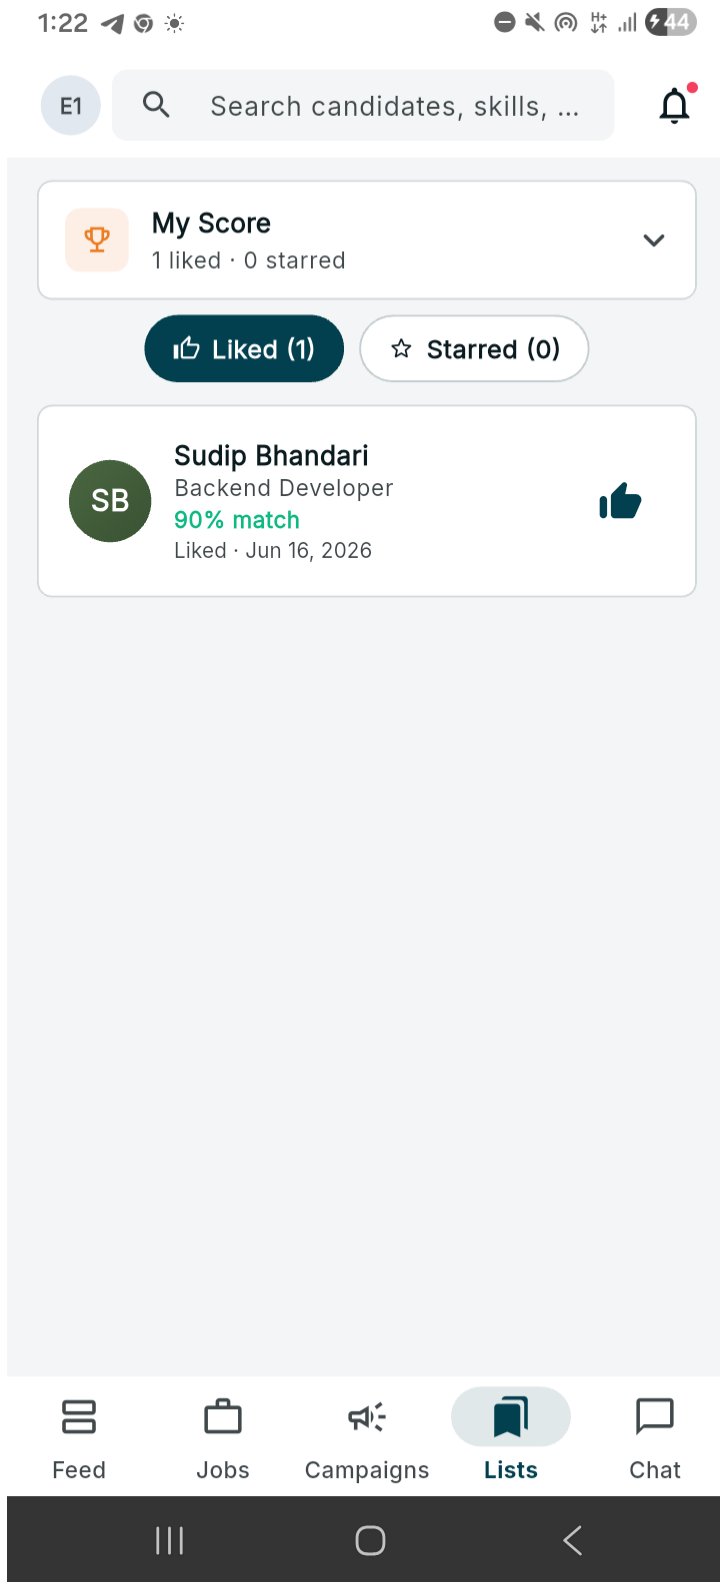

Mobile campaigns - hiring initiatives

20. Mobile App - Lists

Personal shortlists from feed reactions.

- My Score dashboard
- Liked and Starred segments
- Candidate name, role match, fit %, reaction date

Mobile lists - liked and starred

21. Mobile App - Chat

Natural-language Q&A with evidence-backed citations.

- Ask questions like "Who has the strongest Go experience?"
- Cited answers linking to specific CV claims
- Scoped to full CV pile or selected job
